The percentages represent the differences in number of rounds played comparing September 2021 to September 2020.

For more information contact Golf Datatech golfroundsplayed@golf-datatech.com

March 2020 began lockdowns, quarantines, and travel restrictions throughout much of the United States. The result of these quarantines affected the amount of golf played throughout the country. The data comparing 2021 rounds to 2020 should be considered with caution. Many shops/courses were closed in March-May of 2020, the level of granular data we normally provide is not available.
